### PROFILE

Full Stack Developer with experience in designing, constructing, and maintaining dynamic, scalable, and user-friendly web applications. Skilled at creating interactive front-end interfaces and strong back-end systems, with good knowledge of both user experience (UX) and server-side architecture. Demonstrated capability to handle development problems with both analytical accuracy and innovative problem-solving. Key accomplishments include enhancing application performance, increasing usability, and improving overall user engagement.

### WORK EXPERIENCE

#### Full Stack Developer Trainee

September 2024 - Current

Xportsoft Technologies Pvt. Ltd.

- Aspiring Full Stack Developer Trainee with strong frontend and backend technology foundations.
- Eager to expand expertise in full stack development, contribute to dynamic projects, and learn cutting-edge technologies to deliver efficient and scalable solutions.

#### Web Developer Intern

July 2024 - September 2024

ALPHANUMERIC IDEAS

- Found and rectified website problems, which led to a 15% decrease in consumer complaints.
- Helped with backend development by integrating APIs for real-time data processing and using PHP.

### PROJECTS

Ecommerce Website

- Created a feature-rich, responsive e-commerce website that lets customers explore merchandise, control their shopping carts, and conduct safe transactions.
- Using HTML and CSS, user-friendly UI components were designed, guaranteeing cross-browser and device compatibility.
- JavaScript was used to implement interactive features such as dynamic shopping cart updates, product filtering, and search capability.
- Carried out extensive testing and optimization to boost website performance, which enhanced user interaction and improved user experience.

Notes App:-

- Created a Notes app for Android smartphones that allows users to synchronize, write, edit, and manage notes in real time.
- Created user-friendly XML components while following Material Design guidelines to provide a unified user interface.
- Real-time data storage and retrieval via integrated Firebase Firestore ensures smooth device synchronization.
- Firebase Authentication was used to implement user authentication in order to offer secure note access.

Attendance Management System

- Created an online Attendance Management System to automate reporting and tracking of attendance.
- Used JavaScript, HTML, and CSS to design and build the front end, guaranteeing an interactive and responsive user experience.
- Added reporting capabilities to provide thorough attendance reports that support decision-making and data analysis.
